The Essex County Environmental Center is a facility of the Essex County Parks System and is located in West Essex Park. The immediate grounds include over 1 mile of trails, a boardwalk, and a wooded wetland habitat with access to the Upper Passaic River.

Since our opening in May 2005, we have been documenting the local flora and fauna found on our site. We have found raccoons, painted turtles, clams, crayfish, river otter, deer, turkey, coyote, salamanders, green frog, garter snake, screech owl, barred owl, mushrooms, milkweed, spicebush, asters, oaks, maples, cedars, pines, beech, birch and more!

Every month of the year, families and children of all ages can learn something new about nature at the Environmental Center—right in their own Essex County back yard. We are never too young to learn how to protect our world—so sign up and join us for an environmental adventure.
